Printer test page

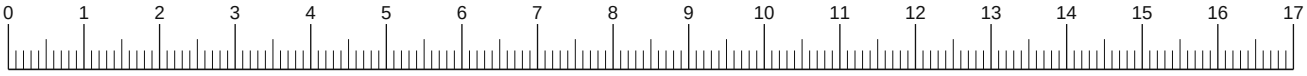

1. Print this page at 100 % (“Actual size”). Turn off “Fit to page” and “Shrink oversized pages”.
2. Measure the squares with a ruler. The 10 cm square must be 10 cm, the 3 in square 3 in, give or take 1 mm.
3. If they are off, change the scale in the print dialog and print again before you print a pattern.

Every pattern PDF has the same square on page one, and a 5 cm ruler on every page.
